SQL MASTERY

Speaker: Chirantan Lonkar, Xavier

Schedule: February 11, 2024 | 5:30PM - 7:00PM

On February 15, 2024, Uniathena organized a seminar via Zoom from 6:00 pm to 8:00 pm. The seminar focused on data manipulation techniques using SQL, catering to the interests of IT students and IT professionals.

The seminar focused on the basics of SQL, explaining all the common terms and ideas used in data manipulation. The speaker showed us code examples, explaining what the code is used for and made us do the same thing every time he finishes a line. Most of the commands he used are about CRUD or Create, Read, Update, and Delete, which is very familiar to us IT students since we had studied this since our lower years.

For many of us that attended the seminar, it served as a valuable refresher on SQL concepts acquired during our academic years. The seminar was very easy to follow and understand even to those who have little knowledge about SQL. Having my OJT this semester found this seminar very useful.

The Uniathena seminar on data manipulation with SQL was a key learning opportunity for us IT students. It helped us strengthen our skills in managing databases and working with SQL. As the need for skilled data analysts keeps growing, it's important for us IT students to take advantage of educational opportunities like this one.

CYBER RESILIENCE: ADAPTING, INNOVATING AND DEFENDING IN DIGITAL AGE

Speaker: Engr. Rodel Villarez

Schedule: February 6, 2024 | 9:00AM - 12:00PM

The Cyber Talks seminar provided a thorough examination of strategies and precautions for individuals navigating the digital world. Attendees gained valuable insights on the basics of cyber threats and putting practical safeguards in place to protect themselves online.

The seminar talks about the concepts of phishing, a tactic employed by cybercriminals to trick users into revealing sensitive information like login credentials. Through social engineering ploys, unsuspecting individuals become targets of these schemes, leading to consequences such as financial loss and identity theft. The seminar taught participants the skills to recognize and proactively address such threats.

Moreover, the discussion extended to the importance of securing personal accounts on social media platforms. With digital footprints expanding, maintaining control over one's online presence is crucial for safeguarding privacy and reducing exposure to risks.

The Cyber Talks seminar served as a comprehensive guide for individuals navigating the virtual landscape. By teaching attendees on how to recognize and mitigate cyber threats, the seminar highlighted the significance of proactive measures in safeguarding personal information and preserving online security.

CYBER RESILIENCE: UNDERSTANDING THE EVOLVING LANDSCAPE OF DATA LEAKS

Speaker: Engr. Rodel Villarez

Schedule: February 27, 2024 | 9:00AM - 12:00PM

In today's digital era, understanding the evolving threat of data leaks is crucial. The seminar today, Cyber Resilience: Understanding the Evolving Landscape of Data Leaks, talks about this topic, offering insights into strategies to combat cyber threats.

The seminar explores the dynamic nature of cyber threats and various forms of data breaches, from unauthorized access to sophisticated cyber-attacks. We learned proactive measures such as robust cybersecurity protocols and employee training to enhance resilience against data leaks. Moreover, the seminar emphasizes the importance of collaboration among stakeholders in the cybersecurity ecosystem and the ethical considerations surrounding data privacy.

By fostering a culture of resilience and prioritizing ethical cybersecurity practices, individuals and organizations can protect digital assets and mitigate the impact of cyber threats better. The seminar thought participants about the knowledge and tools needed to navigate the complex cybersecurity landscape and safeguard against data breaches in today's digital age.

TREND MICRO CYBER SECURITY

Speaker: Dun Vincent Bueno

Schedule: February 6, 2024 | 9:00AM - 5:00PM

On Safer Internet Day, February 6, 2024, DICT-CAR hosted a webinar on cyber security. DICT shared valuable insights into various types of cyberattacks commonly encountered on the internet and in our devices.

The webinar commenced with a discussion on cyberattacks common in the Philippines, revealing that our country ranks among the top 10 globally for such incidents. Government agencies were identified as the primary targets, with a staggering 52% of attacks originating from within the country. The session delved into the different types of attacks, including malware, viruses, and other cyber threats frequently encountered by individuals and organizations.

Towards the conclusion, the webinar shifted focus to preventive measures against cyberattacks. Attendees were informed about actions to take when faced with such threats and were encouraged to implement proactive measures to safeguard their digital assets. Despite the length of the seminar due to detailed explanations of attack types, it served as a valuable refresher on cyber security concepts, reminding participants of the importance of staying vigilant online.

DICT-CAR's cyber security webinar provided essential knowledge on identifying and mitigating cyber threats. By raising awareness about prevalent attack methods and promoting preventive measures, the session aimed to empower individuals to protect themselves and their data in the ever-evolving digital landscape.

MARKETING MANAGEMENT

Speaker: Ronald Piper Ramboanga

Schedule: February 7, 2024 | 7:00PM - 8:00PM

In February 7, 2023, the Knights of Online Marketers (KOM) organized a seminar focusing on digital marketing strategies. The event, conducted online via Zoom meeting and Facebook Live, featured Ronald Piper R. Ramboanga, RN, MA, the CEO herself, as the speaker.

The seminar commenced by addressing the impact of the pandemic on the digital landscape, particularly in marketing and business-related activities. Attendees gained insights into the dos and don't of starting a business in the digital age. Furthermore, the session highlighted the global emergence of digital marketing and online selling, providing entrepreneurs with abundant opportunities for growth. The evolution of businesses from manual labor to automated operations was also discussed, along with the varying approaches people take towards digitalizing their ventures.

Throughout the webinar, the speaker elucidated strategies crucial for entrepreneurial success. One noteworthy concept shared was the "1/3 rule," emphasizing the allocation of income into three categories: one-third for production, one-third for organization, and one-third for reinvestment or business upgrades, including expenses like advertisement. As an IT professional, this insight holds valuable potential for future business endeavors post-retirement from the IT industry.

KOM's digital marketing seminar offered invaluable insights into navigating the digital realm of entrepreneurship. By addressing the evolving landscape of business in the digital age and providing strategic guidance for success, the seminar thought attendees with practical knowledge to thrive in an increasingly digitalized world.
